The Industrial Revolution

Name _____ Date _____

1 Recall, then make a connection.

Start from memory. Write a meaning or quick example for each term.

Industrialization	Productivity	Inspectorate

How can industrialization change productivity without establishing that working conditions improved? Explain what evidence an inspectorate would need to evaluate whether a labor rule operated in practice.

Context for the task

Industrialization changed production through machinery, concentrated workplaces, energy use, and new relationships between employers and workers. Its effects were uneven. Increased output did not automatically mean safe conditions or equal benefits. A factory's production figures answer a different question from a worker's account of hours, injury, or schooling.

2 Work with the numbers.

Read the shift

Fictional record: a 12-year-old works from 6 a.m. to 4 p.m., with one hour of breaks. Use the activity's simplified 8-hour limit.

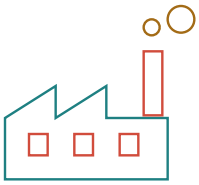

How many hours are worked?

Show your calculation. Label the quantities you use.

Answer: _____ hours

What can this result show? What would need more evidence?

Evidence, application & transfer.

3 Read the evidence closely.

Did the reform operate?

Claim: "The new rule was enforced in this fictional district."

Select all records that directly document enforcement actions in the fictional district.

A. Inspection reports document checks at covered factories.

B. Court records show penalties for confirmed violations.

C. The legislature approves the rule for covered factories.

D. A factory owner promises to comply, with no inspection or enforcement record.

Selections: _____ Explain your reasoning:

4 Apply the idea.

The inspector shortage

Four inspectors initially faced thousands of mills under the historical 1833 system.

Which inference is reasonable?

A. Limited inspection capacity could make consistent enforcement difficult.

B. The law could not affect any factory at all.

C. Every factory automatically complied because inspectors existed.

My choice: _____ Explain why it fits:

5 Carry the idea forward.

Write an inspection memo explaining how industrialization could increase output while creating or intensifying problems for workers. Use the schedule, distinguish the rule from enforcement, and identify one needed source.
