5.5 / Treatment of Psychological Disorders

Name _____ Date _____

1 Make the connection.

Explain each concept in your own words. Add a brief example that shows why it fits.

Evidence-based intervention

Meta-analysis

Therapeutic alliance

Cultural humility

2 Build the explanation.

Four ethical anchors. Place each practice beside the principle it emphasizes.

Choose from the pieces below. Some do not belong. Write a letter in each position and explain the connection.

A. Respect autonomy, privacy, and individual differences.

B. Honor professional responsibilities and trust.

C. A promised benefit justifies any method.

D. Represent qualifications and evidence honestly.

E. Consider and reduce potential harm.

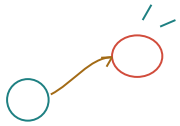

Nonmaleficence - Piece: _____

Fidelity - Piece: _____

Integrity - Piece: _____

Rights and dignity - Piece: _____

Use the idea. Explain the connection.

3 Choose, then explain.

1. Why does a medication reference discuss tardive dyskinesia?

A. It is a reason for a student game to change prescriptions.

B. It is a possible movement-related adverse effect associated with some antipsychotic treatment.

C. It proves every medication has the same effect.

My choice: _____ Why it fits:

2. Simulated review: 30 of 50 participants improve in one condition and 20 of 50 in comparison. What is the difference in improvement rates?

A. 20 percentage points

B. 10 percent of the whole population

C. 50 percentage points

My choice: _____ Why it fits:

4 Bring it together.

Explain why a testimonial and a meta-analysis require different kinds of scrutiny.

One idea I corrected: _____

One question I still have: _____
